

CITYWIDE PERMITS

Driving more efficient and accurate permit processes for your organization

Automate and simplify the entire process of reviewing, approving, and storing building permit applications

CityWide Permits is a full building permit solution

- Store all permit information in a central location
- Manage all fees & billing in-app
- Easy access to real-time information
- Add permit request function to your website

SAVE TIME & RESOURCES

Save administrative time with centralized access to all application information such as digital drawings, property details, and applicant information.

EQUIP STAFF WITH BETTER DATA

Users can access information on property owners, address, roll number, assessed values, PIN numbers, zoning, square footage, and current use.

MANAGE INSPECTOR TASK LISTS

Inspectors have access to personal task lists, property records, previous violations, and past inspection results to streamline the inspection process.

FEE MANAGEMENT ALL IN ONE PLACE

Manage permit fees, development charges, and refundable fees all within the application.

E-PERMITTING CAPABILITIES

Allow citizens to submit permit applications electronically from your organization's website to auto-generate a request in the Permits system.

STANDARD & CUSTOM REPORTING

Generate standard reports like MPAC, CMHC, Stats Can, and Tarion — or custom reports by permits, permit types, and GL Code.
